

# Journey to ABA Therapy in NJ

Locations in New Jersey & Pennsylvania

NeurAbilities.com | Tel: 856-346-0005

## Initial Evaluation

A medical physician conducts an evaluation to determine diagnosis. Some cases may require additional testing through a psychologist. Children with a documented diagnosis of Autism can obtain ABA therapy.

## Coordinate Benefits

Our clinic team coordinates benefits for an Initial Behavior Assessment (IBA).

## Behavior Assessment

A BCBA observes the child, interviews caregivers, and completes an IBA to determine the intensity of services.

## Treatment Options

The BCBA finalizes the IBA report with family input and reviews the assessment and service recommendations with the family.

## Assemble Your Team

The Clinical team will submit for authorization and will coordinate a special team of clinicians for each child.
