

## AUTISM SERVICES

At NeurAbilities Healthcare, families will appreciate the convenience of having autism evaluation, diagnosis, and treatment services within one organization, including:

**Developmental or Neurological Evaluations**

**Psychological Assessments**

**Applied Behavior Analysis (ABA)**

The benefits of our personalized and comprehensive approach to care:

- More accurate diagnoses
- Targeted treatments
- Optimized outcomes

Families will find comfort in our guidance, support, and care coordination, every step of the way.

## MISSION

To transform the lives of patients through precision medicine, behavior sciences and therapeutic treatments with compassion, dignity and respect.

## VISION

To provide hope and achieve positive outcomes for those we serve.

## VALUES

Compassion

Collaboration

Integrity

Excellence

Joy

## INSURANCE-BASED SERVICES

We are in-network with many insurance providers. Please reference our website for an inclusive list.

NeurAbilities is committed to creating a culturally diverse, inclusive and collaborative community for patients and their families, employees and associates where each person is celebrated and has a sense of equal belonging. Learn more: <https://neurabilities.com/DEI-statement>

## Autism Services

# OUR SERVICES

## Developmental or Neurological Evaluations

An appointment with a NeurAbilities developmental pediatrician or neurologist is an important first step in understanding symptoms, including concerns about learning, behaviors, and developmental milestones.

## Psychological Assessments

Our psychological services assist in creating treatment plans, formulating goals for individual educational plans (IEP), and monitoring the benefit of interventions. Assessments are customized to meet individual needs.

## Applied Behavior Analysis (ABA)

We offer 1-to-1 ABA services in home, center, and community settings, customized to meet the unique needs of each individual patient. Our programs are created with a personalized approach to address a variety of skills and goals. Within each of the following ABA programs, we offer a Young Achievers group specifically designed for young children between the ages of 2 and 5 years old to focus on the development of school readiness skills through individual and group instruction.

### Comprehensive ABA

This intensive program provides therapeutic interventions for toddlers 14 months and older that promote generalization of targeted skills. These structured therapy sessions address multiple treatment areas, and typically occupy 25 to 40 hours per week.

### Focused ABA

This targeted treatment program is appropriate for school-aged children as young as 3 years old who need services to address a specific skill or acute treatment goal. Recommended for approximately 15 hours per week.

**Long term data has proven that early intervention services for children with autism result in better long term outcomes.**

3-Year Accreditation
